Column of Files from the Right (Left), Forward, MARCH

Column of Files from the Right (Left), Column Right (Left), MARCH

Description below is for Column of Files from the Right, Forward, MARCH

✪ On the preparatory command, the guide takes a position in front of the file that will move first.

✪ The element leader of the right element turns his or her head 45 degrees to the right and commands "Forward."

✪ At the same time, the remaining element leaders turn their heads 45 degrees to the right and command STAND FAST. Their heads are kept to the right until they step off.

✪ On the command MARCH, the extreme right element steps off (or they perform a column right if that version of the movement is called).

continued...

✪ The element leader of each remaining element commands Forward, MARCH (or a column, if that version is called) as the last cadet in each element passes, ensuring the leader's element is in step with the preceding element.

✪ All elements then incline to the right, following the leading elements in successive order.
